SUMMARY

Product-minded AI professional who bridges business strategy and applied machine learning. Currently designing AI evaluation frameworks that translate architectural compliance into quantifiable business metrics at Koloapp. Experienced in shipping LLM-powered products end-to-end—from defining requirements with stakeholders to deploying user-facing applications. IEEE-published researcher with a strong foundation in NLP, computer vision, and data-driven decision systems. Combines technical depth in prompt engineering and model development with cross-functional leadership and analytical thinking.

EDUCATION

Bachelor of Technology in Computer Science (AI & ML)

August 2021 – May 2025

Karunya Institute of Technology and Sciences, Coimbatore, India

Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Data Structures & Algorithms

EXPERIENCE

Business Analyst / Prompt Engineer

Aug 2025 – Present

Koloapp, Kochi, India

- Defined and built prompt-based evaluation frameworks that assess architectural designs against compliance standards and business KPIs using GPT-4 and Claude APIs
- Translated domain-specific quality criteria into mathematical scoring models integrated within automated AI pipelines
- Developed end-to-end evaluation tools in Python, replacing manual review processes and improving turnaround consistency
- Collaborated with product, design, and engineering teams to align AI outputs with business objectives and user needs

AI Engineer Intern

Jan 2025 – Jun 2025

Workcohol Solutions Pvt Ltd, Chennai, India

- Shipped a medical report analyzer (LangChain + OpenAI API + Streamlit) from prototype to production—extracted structured insights from PDFs and scanned images via OCR
- Partnered with product and engineering teams to scope AI features, define acceptance criteria, and integrate into a Django web application
- Benchmarked medical NLP models (BioBERT, ClinicalBERT) and iterated on prompt strategies based on user feedback to improve extraction accuracy

Web Development Intern

May 2022 – Jun 2022

Bolt IoT, Remote

- Redesigned a quiz platform's frontend using HTML/CSS/JS, improving user flow and page load times

TECHNICAL SKILLS

Languages

Python, Java, C, JavaScript, SQL, HTML/CSS

ML/DL Frameworks

TensorFlow, Keras, scikit-learn, PyTorch (basic)

LLMs & NLP

OpenAI API, LangChain, Prompt Engineering, HuggingFace Transformers

Computer Vision

OpenCV, YOLO, image preprocessing pipelines

Data & Visualization

Pandas, NumPy, Tableau, Power BI, Matplotlib

Tools & Platforms

Git, GitHub, Streamlit, Google Colab, Jira, Docker (basic)

PROJECTS

Medical Report Analyzer (LLMs)

- Built an end-to-end medical report understanding system using LangChain and OpenAI API for structured insight extraction from PDFs and scanned images
- Integrated Tesseract OCR and Streamlit to create an interactive analysis pipeline for clinical documents

Stock Market Prediction Framework

- Built a multi-modal prediction system combining Twitter sentiment (VADER + FinBERT), technical indicators (RSI, MACD), and LSTM time-series models
- Integrated real-time candlestick chart interpretation using CNN-based pattern recognition

Real-Time Object Detection System

- Developed an OpenCV-based motion detection pipeline with background subtraction and contour filtering to reduce false positives
- Processed live video streams at 25+ FPS with optimized frame differencing algorithms

LSTM Forecasting Dashboard

- Built an interactive Streamlit dashboard for time-series forecasting with configurable LSTM hyperparameters
- Visualized prediction intervals and model performance metrics in real time

RESEARCH PUBLICATION

Kevin Jojo, Ebenezer Jangam, Stewart Kirubakaran S. “*A Multi-Modal Framework for Stock Market Prediction Integrating Sentiment, Technical Indicators, and Real-Time Analysis.*” 2025 IEEE International Conference on Contemporary Computing and Communications (InC4), IEEE Xplore, 2025.

LEADERSHIP & RESPONSIBILITIES

Head of Corporate Relations, E-Cell Karunya (Jun 2023 – Jun 2024) — Secured corporate partnerships and organized industry networking events.

Head of Human Resources, E-Cell Karunya (Feb 2023 – Jun 2023) — Managed recruitment pipeline and team onboarding.

CERTIFICATIONS

Google Project Management (Google) · Machine Learning with Python (IBM) · Build & Deploy AI Chatbot (IBM Watson) · Computational Thinking (University of Michigan)
